Asmaa Salah Elsayed

Cyber Security Engineer | Penetration Tester

Cairo, Egypt | 01221993938 | 01069801512

asmaasalh4342@gmail.com | Asmaa salah LinkedIn | Github

SUMMARY

Penetration Tester and Bug Bounty Hunter with hands-on experience in identifying, exploiting, and responsibly reporting security vulnerabilities in web applications and APIs. Passionate about vulnerability research, real-world attack simulation, and improving system security posture. Adept at manual testing, security analysis, and writing clear, actionable vulnerability reports. Continuously developing expertise in cybersecurity through practical experience, certifications, and self-driven learning.

AREA OF EXPERTISE

- Web Application Security Testing
- API Security Testing
- OWASP Top 10 Vulnerabilities
- Penetration Testing (Manual Testing)
- Bug Bounty Hunting
- Vulnerability Assessment & Exploitation

EDUCATION

MHI, Cairo

Bachelor of Engineering - Electronics and Communications Engineering
● Graduation Project “Advanced Self Driving Car” (A+) Grade

EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI)

- Selected twice for the Digital Egypt Pioneers Initiative scholarship program
- Completed intensive training in Cybersecurity and Penetration Testing
- Gained hands-on experience in vulnerability assessment and security tools

National Telecommunication Institute (NTI)

- Completed Cybersecurity training program with a focus on Blue Team fundamentals
- Developed skills in security monitoring, incident analysis, and defensive techniques

SKILLS

TECHNICAL SKILLS:

● **Programming & Scripting**: Python, Bash, C++, JavaScript

● **Defensive Security & Automation**: Incident Response, Threat Hunting.

● **Offensive Security**: Penetration Testing, Exploitation, Payload Development, Social Engineering, Metasploit, Nmap, Burp Suite.

● **Web & Bug Bounty Skills**: Reconnaissance & Information Gathering,IDOR / XSS / SQL Injection / SSRF / CSRF,Manual Security Testing,

● **Platforms & Environments**: Linux System Administration, Windows Internals, VMware, VirtualBox.

● **Technical Skills**: ROS (Robot Operating System), Real-Time Sensor Data Processing, Robotics Fundamentals, System Integration (Hardware & Software Communication).

● **CAD Design**: Basic Level – AutoCAD / SolidWorks fundamentals

COURSES & SELF LEARNING

- CompTIA Security+
- Mahara Tech (Ethical Hacking)
- Idernetrs Academy(Security+)
- Cybrary(Information security fundamentals)
- NSTANT (Penetration Testing)
- UDACITY (Advanced Cloud DevOps)
- Coursera (CAD)
- Udemy (Low Current)

PROJECTS

- **Advanced Self Driving Car (ROS-based Graduation Project)**
  Developed and integrated key modules of an autonomous robotic system using ROS, enabling real-time sensor fusion, inter-system communication, and autonomous navigation. Contributed to system coordination and performance optimization in dynamic environments

- **Metasploitable2 Penetration Testing Project**

  Conducted vulnerability assessment and penetration testing on Metasploitable2 (intentionally vulnerable machine).

  Performed reconnaissance, port scanning, and service enumeration using security tools.

  Identified and analyzed common vulnerabilities (misconfigurations, outdated services, weak authentication).

  Documented findings with structured security reporting and mitigation recommendations.

LANGUAGES

- **Arabic**: Native
- **English**: Professional Proficiency
